

Tracking and Fleet  
Management

**Afri** telematics

From Africa for Africa

## AFRI-FLEET

Afritelematics provides fleet managers with immediate and secure access to information about their vehicles and drivers. An extensive security ensures the right information is delivered to the right people; online via a thin client.

Track your fleet in real-time or replay historic trips on a map. All our applications are hosted in highly secure, professional data centers protecting your data.

## AFRI-FLEET

WHEN YOU ARE  
LOOKING FOR A  
COMPLETE FLEET  
MANAGEMENT  
SOLUTION, OUR  
AFRI-FLEET UNIT  
IS YOUR IDEAL  
SOLUTION

Monitor every move of  
your driver and vehicle  
to reduce fuel cost and  
maintenance.

## REPORTS

All recorded information can be exported for individual drivers or vehicles, user defined companies, and depots. The following lists some of the reports available:

- Executive Summary Report
- Trip Detail Report
- Event Detail Report
- Vehicle and Driver Rating

## MOBILE

Afritelematics mobile application wouldn't be complete without the support of the popular and fast growing Android platform. Android phones have great screens and the mobile applications have been packaged to provide the best possible experience. Users can also access their fleet data via smart phone application from any location in the world.

## KEY FEATURES
